2026 Action Plan Template

Slovenia Chapter

Chapter members will discuss the unique needs and priorities in February 2026.

- **Context:**
  Access to the Internet in Slovenia is affordable, reliable, and resilient, with approximately 95% of the population using it. Therefore, the activity plan focuses on the Future Internet and related topics, digital skills education for the elderly, and cybersecurity awareness for young people.
- **Objectives:**
  - Promote a culture of safe Internet use
  - Enhance knowledge among specific groups, such as the elderly
  - Contribute to the NGI project led by ISOC NL
  - Support the development of new technical fields, including quantum computing networks
- **Activities:**
  Several activities are planned, including:
  - Participation in the development project of the national quantum network in Slovenia
  - Maintenance of the website with up-to-date news, relevant publications, and lectures
  - Contribution to the NGI project led by ISOC NL
  - Participation in events aligned with the Internet Society's mission
  - Organization of meetings and the event marking **35 years of the Internet in Slovenia**
- **Partnerships:**
  ISOC Slovenia plans to organize the 35th anniversary celebration of the Internet in Slovenia and to invite relevant partners, including governmental institutions, ICT companies (such as Internet service providers), the Computer Museum of Slovenia, and other stakeholders.
- **Target Audience:**
  Various groups within the Slovenian population, with a focus on audiences relevant to advancing the Internet Society's mission.
- **Time and Locations:**
  Most activities will take place online. The celebration of **35 years of the Internet in Slovenia** will be an open event with an invited public audience.
- **Internet Society Support:**
  We expect support for regular activities and partial co-funding for the event **"35 Years of the Internet in Slovenia."**

2026 Action Plan Template

Slovenia Chapter
